

Petrina Salema

Headline

Design Principal for Spaces & Interiors

Sub-line

Architecture and interior design across residential, hospitality, healthcare, and civic spaces, from Tanzania to Austria.

About

I'm trained as an architect and interior designer, with an MSc in Architecture from Chalmers University of Technology (Sweden) and a BA (Hons) in Interior Design from Bournemouth University (United Kingdom). Over more than a decade, I've worked across Tanzania, Sweden, the United Kingdom, and Austria, on projects spanning healthcare, civic and institutional buildings, and residential and hospitality interiors.

In 2021, I founded my own independent design practice in Vienna. This portfolio brings together that full range: work from my time inside architecture practices, and the independent projects that followed, including the properties that became the foundation of Jubili, a hospitality brand I later co-founded.

Featured Projects

Tegelweg — 4-Bedroom Apartment, Vienna

Residential interior design / hospitality conversion · Design lead, Petrina Salema · Full interior concept, space planning, FF&E sourcing and styling

Designed and grown in phases over five years, from an initial 2-bedroom configuration to its current 4 bedrooms, this project is where interior concept, space planning, and guest-experience design were tested and refined against real, ongoing use. Designed for Jubili, a hospitality brand co-founded as part of establishing this practice.

[Add interior photos here: per room/phase, ideally consistent with the images used on the Carrd hub and Jubili's own site]

Brabbeegasse — Single-Unit Apartment, Vienna

Residential interior design / hospitality conversion · Design lead, Petrina Salema · Concept, styling, sourcing

Designed for Jubili as the brand expanded to other properties. This project demonstrated that a rented space can be transformed to reflect a brand's aesthetic and also be returned to its original state once the leasing period ends, an important proof of concept for the reversibility of smart design interventions.

Experience / Selected Work

APC Architectural Pioneering Consultants

Project Manager · Dar es Salaam, Tanzania · Feb 2017 – Jul 2020

Though formally contracted as Project Manager, my role across these projects centered on architectural design leadership: directing creative design development, training and mentoring junior architects, and delivering client presentations and competition pitches.

Rehabilitation of the Analytical Fingerprint Laboratory Building, AMGC

Managed this government-client project through its complete lifecycle, feasibility through construction and defects liability, leading the architectural design work and mentoring junior team members throughout. Collaborated with local craftsmen on the design of a feature wall using custom 3D tiles sourced from the client's own on-site ceramic workshop, and delivered client presentations explaining the building's hybrid system design. Resolved equipment delays and post-handover technical faults during the defects liability period.

Construction of New Athletic Centre, International School of Tanganyika

Led the architectural design and design-team direction through a full topographical survey and revised building permit submission, and coordination of statutory building compliance. Directed the tendering activities to select the contractor based on professional track record, and presented project status and recommendations to the client's board of directors and representatives at key stages.

~~**Montessori Children's House and Primary School — Competition Entry, 2nd Prize**~~ Led the design team on a competition entry grounded in direct research into Montessori pedagogical principles, including site visits to two locations to gather data and speak with future users. Directed development of the design concept and personally delivered the competition pitch presentation.

International School of Tanganyika, Classrooms Block D & E

Led design refinement of fixed furniture detailing through construction, working closely with junior team members during the construction phase. Carried out supervision during the defects-liability period, including an added scope of detailing and construction for the classroom blocks.

Detail Design and Construction of New CCBRT Maternity Hospital

Led a team of architects in preparing detail design drawings and production information for a healthcare facility with high services complexity, directing the team's work overlaying design-development drawings to verify correct placement of medical equipment against MEP services.

Aga Khan Hospital

Involved in preparing the construction drawings for the jali screens that are a prominent feature of the hospital facade.

Epitome Architects Limited

Assistant Architect & Interior Designer · Dar es Salaam, Tanzania · Mar 2013 – Mar 2016

Design and Supervision of New Bank of Tanzania Branch, Mwanza

Contributed across the full pre-construction lifecycle of a regional bank headquarters, from feasibility (including comparative site visits to BOT branches in Dar es Salaam, Zanzibar, and Dodoma) through tender award. Led office space programming based on departmental needs, coordinated with MEP engineers and specialist sub-consultants on a technically complex building, and contributed to a cost-reduction exercise to keep the project within budget. Carried out site supervision in the initial construction phase.

Design and Supervision of NHC Eco Residence, Dar es Salaam

Participated in the project from tendering phase to handover and DLP of the National Housing Corporation Eco Residence apartments. I worked directly with the project architect and leased with the contractor in this Design and Build competition win. I prepared designs up to construction drawings to address variations that occurred during construction. Carried out additional detail and interior fitout, working with light consultant and other experts to ensure that the building met the required standard to receive a Green-mark award.

Design and Supervision of TanHouse Office Building, Dar es Salaam

Participated in the construction of the office building. Working closely with the project architect, I prepared designs up to construction drawings to address variations that occurred during construction. Carried out additional detail and interior fitout.

PPF Commercial Property and New PPF Head Office, Competition

Participated in the Design and Build competition to propose a multi-use building for the pension fund. Carried out meetings with a team of professionals including, engineers and quantity surveyors to give a comprehensive competition entry with a cost estimate. The concept focused on form and distinctive facade treatment to demarcate the different functions of the mixed-use building

Alterations & Extension to Existing House on Plot No.301, Chake Chake Road

Worked on a scheme design for a residential apartment complex. Focused on meeting the clients brief to maximise the plot, but also ensured that each line house has their own designated garden space to give a sense of seclusion and privacy. Incorporating locally available natural materials such as stone on the facade.

New Office Accommodation for the Ministry of Foreign Affairs and International Cooperation

The Ministry of Foreign Affairs and International Cooperation was finally ready to build their own headquarters. I participated in the design process and prepared the presentation documents for the project pitch that focused on giving the office building a statement feature and bold colour that matched the organisation's corporate image. We designed the building to have a visible presence that holds its own in the built-up city centre.

Operational Theatre to be Built at Bugando Medical Centre

Designed a small block with operational theaters as overflows for the main hospital. Finishing materials that were similar to existing buildings were used so that the new structure fits in seamlessly. Carried out the project from initial design to tender action.

Bank M Headquarters

Prepared visuals to demonstrate the proposed entry treatment for a small bank building, translating drawings into visual representation that the client could understand.

Independent Client Projects

Children's Playroom — *Residential space redesign, 1210 Vienna, 2025* Transformation of a basement storage space into a multifunctional children's playroom.

Retail Fit-Out — *Commercial interior redesign, 1010 Vienna, 2025* Layout and interior fit-out for a retail space, with emphasis on concept mood creation.

[Add small thumbnail images here if available; black and white treatment can help unify inconsistent photo quality across these two entries]

Biography https://petrinalema.vercel.app/about	Petrina, Founder & Designer Petrina is an architect and interior designer based in Vienna. Trained with an MSc in Architecture from Chalmers University of Technology (Sweden) and a BA (With honors) in Interior Design from Bournemouth University (United Kingdom), her work draws on more than a decade across Tanzania, Sweden, the United Kingdom, and Austria, on healthcare, civic and institutional buildings, and residential and hospitality interiors. She founded her independent practice in 2021 on a simple observation. Most rooms were never asked to support the life people want in them. The practice takes on a few projects a year, from the plan through materials, sourcing, and styling, with clients in Vienna, abroad, and remotely. This portfolio gathers that full range: projects from her years inside architecture practices, and the independent work that followed, including the homes that became Jubili, the hospitality brand of this practice.
